Dog Medication Side-Effect & Symptom Tracker

Record changes after a medicine is started, refilled or adjusted. This log supports veterinary communication; it does not diagnose reactions.

Dog's name		**Current weight**	
Vet clinic		**Vet phone**	

Medication	Date started / changed	Dose time(s)	Reason for use

Observation log

Date/time	What changed	Severity	Time since dose	Appetite / energy	Vomiting / stool	Action

Urgent warning signs

Collapse, trouble breathing, seizures, marked facial swelling, repeated vomiting, black/bloody stool or profound sedation should not be tracked for later - seek urgent veterinary advice.
